

DG Interns Hub

Web Development Internship

Week 2 Task

Student: Pavan Kumar Katkuri

Project: Personal Professional Portfolio

Technologies: HTML, CSS, JavaScript

GitHub: <https://github.com/Pavankumar-std/web-development-week-2>

1. Introduction and Objective

- The objective of Week 2 was to build a basic understanding of frontend development using HTML, CSS and JavaScript.
- The project is a personal professional portfolio containing Header, Hero, About, Services, Contact and Footer sections.
- The task also focused on separate project files, basic responsive design, JavaScript interaction and GitHub submission.

2. Technologies and Project Structure

- HTML5 – semantic webpage structure and content.
- CSS3 – colors, spacing, Flexbox, hover effects and responsive styling.
- JavaScript – button alert and contact form validation.
- VS Code – development environment.
- Browser / Live Server – testing.
- GitHub – source-code hosting.
- Structure: Week-2-Web-Development / index.html / style.css / script.js / images/

3. HTML Structure

- The HTML file provides the foundation of the website using semantic elements.
- Header and navigation contain the portfolio name and section links.
- Hero introduces Pavan Kumar and provides a call-to-action.
- About explains background and learning goals.
- Services presents three service cards.
- Contact contains user input fields and Footer provides copyright and social links.

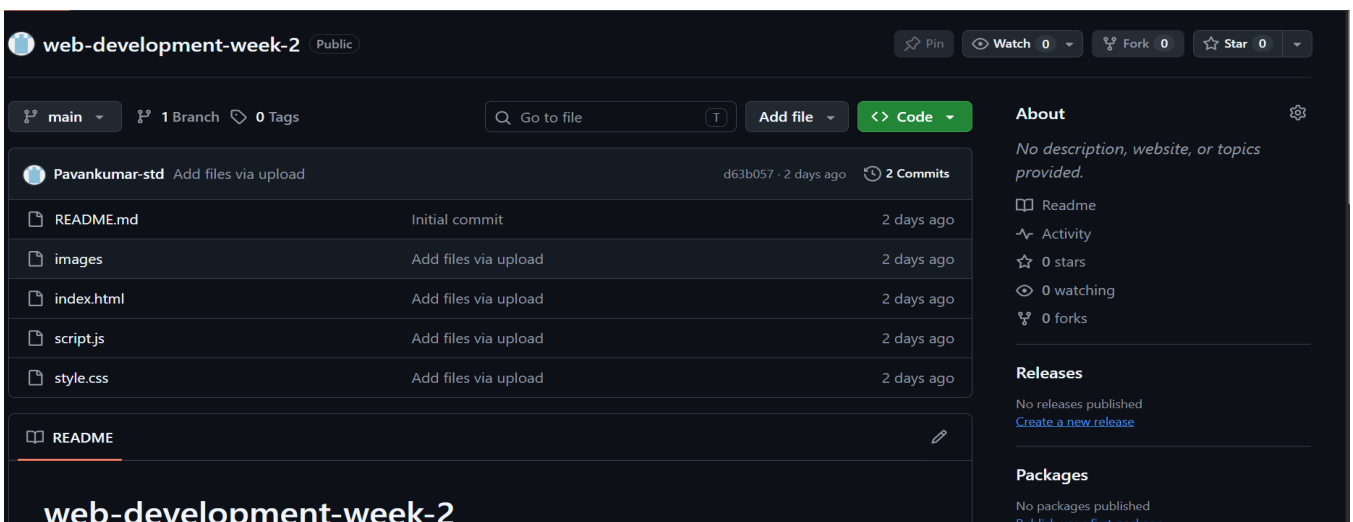

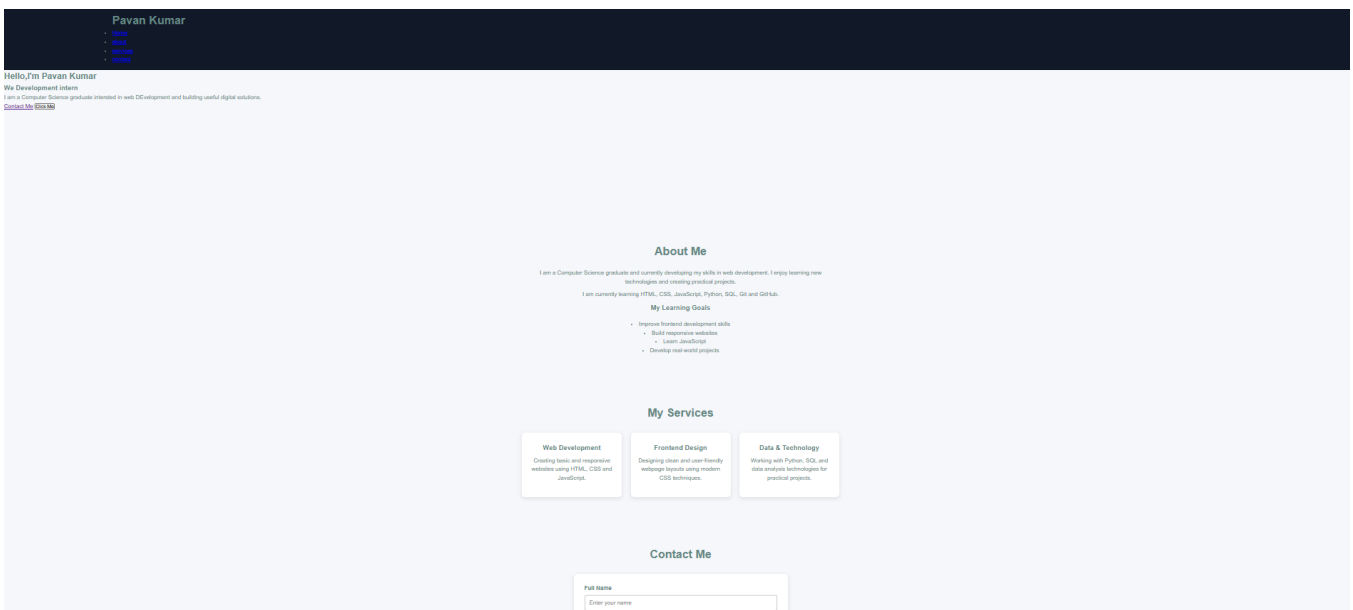

```
index.html > html > body > header > nav > ul.nav-link
1  <!DOCTYPE html>
2  <html lang="en">
3    <head>
4      <meta charset="UTF-8">
5      <meta name="viewport" content="width=device-width,initial-scale.0">
6      <title>Pavan Kumar | Web Developer</title>
7      <link rel="stylesheet" href="style.css">
8    </head>
9    <body>
10     <header>
11       <nav class="navbar">
12         <h1 class="logo"> Pavan Kumar</h1>
13         <ul class="nav-link">
14           <li><a href="#home">Home</a></li>
15           <li><a href="#about">about</a></li>
16           <li><a href="services">services</a></li>
17           <li><a href="#contact">contact</a></li>
18         </ul>
19       </nav>
20     </header>
21     <section id="home" class="hero">
22       <div class="hero-content">
23         <h2>Hello,I'm Pavan Kumar</h2>
24         <h3>We Development intern </h3>
25       <p>
26         I am a Computer Science graduate intersted in
27         web Dvelopment and building useful digital solutions.
28       </p>
29     </section>
```

4. CSS Styling and Layout

- CSS transforms the HTML structure into a clean portfolio interface.
- Flexbox is used for navigation, hero content and service cards.
- Padding and margins provide spacing between sections.
- Hover effects are applied to links, buttons and cards.
- Responsive media queries adapt the layout for smaller screens.

5. JavaScript Features

- Button Click Alert – the Click Me button displays a welcome message.
- Form Validation – required name, email and message fields are checked.
- Basic email validation checks for a valid email pattern.
- Invalid input is stopped with an alert; valid input produces a success message and resets the form.

6. Website Screenshots

7. Testing and Verification

- Navigation and section links were checked.
- CSS and JavaScript files were linked and tested.
- Button alert and contact-form validation were tested.
- Hover effects, service cards and responsive CSS were included.
- The project was uploaded to a public GitHub repository.

8. GitHub Submission

- Repository: <https://github.com/Pavankumar-std/web-development-week-2>
- The repository contains README.md, images, index.html, script.js and style.css.

The screenshot shows a GitHub repository page for 'web-development-week-2' by user 'Pavankumar-std'. The repository is public and has 0 stars, 0 forks, and 0 watchers. The main branch is 'main'. The repository contains 2 commits. The files listed are README.md, images, index.html, script.js, and style.css, all added via upload 2 days ago. The README file is selected and shows the title 'web-development-week-2'. The right sidebar shows the 'About' section with no description, website, or topics provided, and the 'Releases' and 'Packages' sections with no published items.

9. Learning Outcomes and Conclusion

- I learned how HTML, CSS and JavaScript work together to create a functional frontend web application.
- Key outcomes: semantic HTML, CSS styling, Flexbox, responsive design, hover effects, JavaScript events, form validation, local testing and GitHub workflow.
- Future improvements: advanced animations, mobile menu, stronger validation and GitHub Pages deployment.
